

Why our chairs offer the most features and benefits...

"the difference is in our nuts and bolts"

Horizon employs our unique riveted "T"nut system. "T"nuts are fixed on both sides of the plywood frame. This important construction feature will not allow the "T"nut to back out or loosen with use.

6 of these self-locking bolts (two more than industry standard) hold the seat control securely to the seat pan. Treated with "Nylok"® – a locking compound to prevent loosening during normal use.

Standard on most Horizon chairs, injection molded foam cushions offer superior long term comfort and greater resistance to compacting than ordinary foam.

Extra heavy duty controls. On most models the nut is exposed for easy adjustments.

Heavy duty dual wheel caster exceeds ANSI/BIFMA standards; smooth sliding action and durable.

Extra strong, multi core plywood seat & back construction. Fully finished pans ensure no unsightly construction materials are exposed.

Arm kits are easily mounted onto a steel plate, which is fastened to an integral part of the chair frame. Superior engineering & design make these arms exceptionally strong while offering width adjustment as a standard feature.

German made "Suspa" gas lift, world leader in gas cylinder technology. Class 4 rated for top performance and reliability.

Five star steel base offers steel to steel strength. Handsome polymer cap adds extra protection from scuff and wear.

Additional Benefits and Options...

15 Year Limited Warranty

Prompt, efficient 1-800 service number ensures our customers peace of mind when they buy a Horizon chair.

Fabric Selection

A large selection of durable fabrics in popular colours. All fabrics meet the flammability specifications of the State of California, Tech Bulletin 117, sec. E. Most exceed Industry "Heavy Duty" abrasion rating.

Ultra fast turnaround on custom upholstery jobs.

In Stock Program

Same day shipping on our most popular frames and fabrics.

Selective Distribution

Opportunities to promote Horizon in the most beneficial manner; emphasis on quality, value and comfort.

Optional Arm Kits

Easy on site installation; three arm kits are available for our task and operator seating. T arms offer width and height adjustments as a standard feature. Loop arms come standard with width adjustments.

Optional Drafting Kit

Easy on site installation; the drafting kit converts our operator and task seating to a drafting stool in an instant.
